EVIDENCE OF AFTER SCHOOL’S IMPACT ON STUDENTS’ WELL-BEING

Only 10 states* have included questions regarding participation in after school programs in their state Youth Risk Behavior Survey (YRBS), conducted as a part of an effort by the U.S. Centers for Disease Control and Prevention. However, these additional questions have produced findings demonstrating positive correlations between participation in after school programs and young people’s mental and physical health. For example:

**ALASKA**

Students participating in after school programs at least two days a week were 18% less likely to use alcohol, 39% less likely to use marijuana, and 28% less likely to have an unexcused absence.

**VERMONT**

High schoolers who participated in at least one hour of after school activities were less likely than their non-participating peers to report carrying a weapon or report being threatened or injured by a weapon on school property.

**WISCONSIN**

Students involved in at least one hour of extracurricular activities report lower rates of anxiety, depression, and suicidal thoughts.**

*AK, CT, MI, MN, NM, OH, VT, VI, WA, WI

**The Wisconsin YRBS question in the middle school questionnaire asked, “During an average week when you are in school, how many total hours do you participate in school activities such as sports, band, drama, or clubs?” and the high school questionnaire asked, “Do you participate in any school activities, such as sports, band, drama, or clubs?”

These student quotes are a small sampling of the invaluable supports and experiences after school programs are providing young people—from creating a safe space where they can connect with caring adults to helping them build the skills to reach their full potential.

However, in Colorado, for every child in an after school program, 5 more would participate and are missing out, despite strong public support for after school. A national fall 2022 survey found that approximately 8 in 10 registered voters said that after school programs are an absolute necessity for their community (79%) and want their federal, state, and local leaders to provide more funding for programs (80%).

AFTERSCHOOL PROGRAMS ACCELERATE STUDENTS’ ACADEMIC GROWTH AND SUPPORT THEIR WELL-BEING

Among Colorado students in after school programs:

- 70% are getting homework help
- 69% are engaging in STEM learning opportunities
- 82% are taking part in physical activities
- 97% are interacting with their peers and building social skills
- 79% are building confidence
- 85% are learning responsible decision-making
- 92% of Colorado parents are satisfied with their child’s after school program

- 92% of Colorado parents are satisfied with their child’s after school program
Studies have shown that students regularly participating in quality afterschool programs attend school more often, are more engaged in school, get better grades, and are more likely to be promoted to the next grade. A 2022 evaluation of Colorado’s 21st CCLC programs by Catherine Roller White Consulting found that, based on teachers surveyed, among students in need of improvement attending programs, 8 in 10 improved their academic performance (80%) and participation in class (80%), and more than 7 in 10 were more attentive in class (75%), more motivated to learn (71%), and improved in turning in satisfactory homework (71%). Students who attended 21st CCLC programs in both the fall and spring made significantly more improvement than other students in the areas of academic performance, homework completion, class participation, and motivation.

### Afterschool Programs Support Working Families

Colorado parents agree that afterschool programs:

- 82% are helping working parents keep their jobs
- 81% are providing working parents peace of mind knowing that their children are safe

### Afterschool Programs Are a Smart Investment

An overwhelming majority of Colorado parents favor public funding for afterschool and summer learning programs.

- 88% support public funding for afterschool programs
- 90% support public funding for summer programs

Research spanning several states shows that every $1 invested in afterschool programs saves at least $3 by:
- Increasing kids’ earning potential as adults
- Improving kids’ performance at school
- Reducing crime and juvenile delinquency

### 21st Century Community Learning Centers

21st Century Community Learning Centers (21st CCLC) are local before-school, afterschool, and summer learning programs that serve students attending high-poverty, low-performing schools. These programs engage students in hands-on learning activities aimed at supporting their academic growth, provide a variety of enrichment activities to complement school-day learning, and offer educational and support services to the families of participating children. The 2022 Department of Education annual performance report of 21st CCLC found that among regular participants in need of improvement:

- NEARLY 1 IN 2 improved their language arts or math grades
- NEARLY MORE THAN 3 IN 5 improved their behavior in class
- NEARLY 7 IN 10 improved their homework completion and class participation

In Colorado, 20,250 children in 122 communities take part in a 21st Century Community Learning Center. 21st CCLC grants are the only dedicated federal funding sources that support local communities’ afterschool and summer programs. Demand for programming in Colorado is so great that more than 4 out of every 10 applications were not funded during the most recent competition.

### AMERICAN RESCUE PLAN FUNDING IS HELPING INCREASE ACCESS TO AFTERSCHOOL AND SUMMER PROGRAMS

A spring 2023 survey of afterschool and summer program providers found that while less than 1 in 5 providers (17%) report that they have received COVID-relief funding, those with this funding stream have been able to use it to keep their doors open and increase access to their program. Programs report that they have been able to bolster staff recruitment efforts (47%), hire more staff (44%) and serve more students (44%), expand program offerings (38%), and offer new summer programs (18%).

Funds from American Rescue Plan (ARP) continue to present a tremendous opportunity to help increase access to afterschool and summer programs. For example, in Silverthorne, Colorado, Theatre SilCo was able to start its free dual-language VIVO After School Theatre program with help in part from $528,432 in funding from the state’s ARP Elementary and Secondary School Emergency Relief (ESSER) III Expanded Learning Opportunities Grant Program. The program—which began in January 2022 with a staff of two teaching artists—has since grown to a staff of eight due to high demand, and now serves 120 elementary school students. Students in the program learn about all aspects of the theater, including playwriting, stage acting, lighting and sound design, and stage management, while also developing critical life skills. Teaching artists work with students to develop skills such as the ability to work collaboratively, think critically, problem solve, and be curious and creative, as well to help them build their self-confidence and feel comfortable expressing their thoughts and feelings.
