

# This is Afterschool in Washington, D.C.

"Afterschool programs created so many opportunities for me, and I love the valuable mentorship I have had and the connections I made. Afterschool programs taught me the importance of goals and my dreams."

"From my experience as a military child, I really had to struggle with the difficulty of trying to be myself. ... Having an afterschool program can get kids out of their comfort zone and [help them] make new friends. Meeting people in these programs not only feels great but also allows students to show their true self."

These student quotes are a small sampling of the invaluable supports and experiences afterschool programs are providing young people—from creating a safe space where they can connect with caring adults to helping them build the skills to reach their full potential.

However, in Washington, D.C., for every child in an afterschool program, 1 more would participate and is missing out, despite strong public support for afterschool. A national fall 2022 survey found that approximately 8 in 10 registered voters said that afterschool programs are an absolute necessity for their community (79%) and want their federal, state, and local leaders to provide more funding for programs (80%).

## AFTERSCHOOL PROGRAMS ACCELERATE STUDENTS' ACADEMIC GROWTH AND SUPPORT THEIR WELL-BEING

Among Washington, D.C., students in afterschool programs:

**77%** are getting homework help

**95%** are interacting with their peers and building social skills

**88%** are engaging in STEM learning opportunities

**82%** are building confidence

**83%** are taking part in physical activities

**79%** are learning responsible decision-making

**95%** of Washington, D.C., parents are satisfied with their child's afterschool program

## EVIDENCE OF AFTERSCHOOL'S IMPACT ON STUDENTS' WELL-BEING

Only 10 states\* have included questions regarding participation in afterschool programs in their state Youth Risk Behavior Survey (YRBS), conducted as a part of an effort by the U.S. Centers for Disease Control and Prevention. However, these additional questions have produced findings demonstrating positive correlations between participation in afterschool programs and young people's mental and physical health. For example:

**ALASKA** Students participating in afterschool programs at least two days a week were 18% less likely to use alcohol, 39% less likely to use marijuana, and 28% less likely to have an unexcused absence.

**VERMONT** High schoolers who participated in at least one hour of afterschool activities were less likely than their non-participating peers to report carrying a weapon or report being threatened or injured by a weapon on school property.

**WISCONSIN** Students involved in at least one hour of extracurricular activities report lower rates of anxiety, depression, and suicidal thoughts.\*\*

\*AK, CT, MI, MN, NM, OH, VT, VI, WA, WI

\*\*The Wisconsin YRBS question in the middle school questionnaire asked, "During an average week when you are in school, how many total hours do you participate in school activities such as sports, band, drama, or clubs" and the high school questionnaire asked, "Do you participate in any school activities, such as sports, band, drama, or clubs?"

Studies have shown that students regularly participating in quality afterschool programs attend school more often, are more engaged in school, get better grades, and are more likely to be promoted to the next grade. A 2022 evaluation of the 21<sup>st</sup> CCLC programs in Washington, D.C., by the American Institutes for Research found, when surveying program participants about how they felt about their program that day, 90% of students enjoy activities at their programs, 85% felt happy during programming, 82% find activities interesting, 78% felt that they learned something or got better at something in the program, and 71% of students said that they could see themselves using what they learned in the program in other areas of their life.

### AFTERSCHOOL PROGRAMS SUPPORT WORKING FAMILIES

Washington, D.C., parents agree that afterschool programs:

**84%** are helping working parents keep their jobs

**90%** are providing working parents peace of mind knowing that their children are safe

### AFTERSCHOOL PROGRAMS ARE A SMART INVESTMENT

An overwhelming majority of Washington, D.C., parents favor public funding for afterschool and summer learning programs.

Research spanning several states shows that **every \$1 invested** in afterschool programs **saves at least \$3** by:

- ✓ Increasing kids' earning potential as adults
- ✓ Improving kids' performance at school
- ✓ Reducing crime and juvenile delinquency

## 21<sup>st</sup> Century Community Learning Centers

21<sup>st</sup> Century Community Learning Centers (21<sup>st</sup> CCLC) are local before-school, afterschool, and summer learning programs that serve students attending high-poverty, low-performing schools. These programs engage students in hands-on learning activities aimed at supporting their academic growth, provide a variety of enrichment activities to complement school-day learning, and offer educational and support services to the families of participating children. The 2022 Department of Education annual performance report of 21<sup>st</sup> CCLC found that among regular participants in need of improvement:

- ✓ **NEARLY 1 IN 2** improved their language arts or math grades
- ✓ **NEARLY 7 IN 10** improved their homework completion and class participation
- ✓ **NEARLY MORE THAN 3 IN 5** improved their behavior in class

In Washington, D.C., 9,528 children in 89 communities take part in a 21<sup>st</sup> Century Community Learning Center. 21<sup>st</sup> CCLC grants are the only dedicated federal funding sources that support local communities' afterschool and summer programs. Demand for programming in Washington, D.C., is so great that 2 out of every 3 applications were not funded during the most recent competition.

### AMERICAN RESCUE PLAN FUNDING IS HELPING INCREASE ACCESS TO AFTERSCHOOL AND SUMMER PROGRAMS

A spring 2023 survey of afterschool and summer program providers found that while less than 1 in 5 providers (17%) report that they have received COVID-relief funding, those with this funding stream have been able to use it to keep their doors open and increase access to their program. Programs report that they have been able to bolster staff recruitment efforts (47%), hire more staff (44%) and serve more students (44%), expand program offerings (38%), and offer new summer programs (18%).

Funds from American Rescue Plan (ARP) continue to present a tremendous opportunity to help increase access to afterschool and summer programs. For example, Washington, D.C., is investing \$11.5 million in ARP funding to expand the Marion Barry Summer Youth Employment program (SYEP) for high school students in need to complete credit recovery or summer learning. Students participating in SYEP's "Earning for Learning" model are paid to complete summer course work at their school and complete meaningful workforce development projects, intern, or engage in career-focused skill-building.
