

This is Afterschool in Hawai'i

"Afterschool programs created so many opportunities for me, and I love the valuable mentorship I have had and the connections I made. Afterschool programs taught me the importance of goals and my dreams."

"From my experience as a military child, I really had to struggle with the difficulty of trying to be myself. ... Having an afterschool program can get kids out of their comfort zone and [help them] make new friends. Meeting people in these programs not only feels great but also allows students to show their true self."

These student quotes are a small sampling of the invaluable supports and experiences afterschool programs are providing young people—from creating a safe space where they can connect with caring adults to helping them build the skills to reach their full potential.

However, in Hawai'i, for every child in an afterschool program, 2 more would participate and are missing out, despite strong public support for afterschool. A national fall 2022 survey found that approximately 8 in 10 registered voters said that afterschool programs are an absolute necessity for their community (79%) and want their federal, state, and local leaders to provide more funding for programs (80%).

AFTERSCHOOL PROGRAMS ACCELERATE STUDENTS' ACADEMIC GROWTH AND SUPPORT THEIR WELL-BEING

Among Hawai'i students in afterschool programs:

77% are getting homework help

97% are interacting with their peers and building social skills

61% are engaging in STEM learning opportunities

78% are building confidence

86% are taking part in physical activities

67% are learning responsible decision-making

99% of Hawai'i parents are satisfied with their child's afterschool program

EVIDENCE OF AFTERSCHOOL'S IMPACT ON STUDENTS' WELL-BEING

Only 10 states* have included questions regarding participation in afterschool programs in their state Youth Risk Behavior Survey (YRBS), conducted as a part of an effort by the U.S. Centers for Disease Control and Prevention. However, these additional questions have produced findings demonstrating positive correlations between participation in afterschool programs and young people's mental and physical health. For example:

ALASKA Students participating in afterschool programs at least two days a week were 18% less likely to use alcohol, 39% less likely to use marijuana, and 28% less likely to have an unexcused absence.

VERMONT High schoolers who participated in at least one hour of afterschool activities were less likely than their non-participating peers to report carrying a weapon or report being threatened or injured by a weapon on school property.

WISCONSIN Students involved in at least one hour of extracurricular activities report lower rates of anxiety, depression, and suicidal thoughts.**

*AK, CT, MI, MN, NM, OH, VT, VI, WA, WI

**The Wisconsin YRBS question in the middle school questionnaire asked, "During an average week when you are in school, how many total hours do you participate in school activities such as sports, band, drama, or clubs" and the high school questionnaire asked, "Do you participate in any school activities, such as sports, band, drama, or clubs?"

Studies have shown that students regularly participating in quality afterschool programs attend school more often, are more engaged in school, get better grades, and are more likely to be promoted to the next grade. A 2021 evaluation of Hawai'i's 21st CCLC programs by IMPAQ International LLC found that students participating in 21st CCLC programs made behavioral gains. Students who attended 21st CCLC programs regularly received fewer behavioral referrals and were less likely to be chronically absent than their classmates who attended fewer than 30 days. While the Hawai'i Department of Education (HIDOE) waived assessments due to COVID-19, a 2020 IMPAQ evaluation found that 21st CCLC participants outperformed their non-participating peers, with a higher percentage of regularly attending 21st CCLC participants meeting or exceeding proficiency in English language arts (52% vs. 42%), math (41% vs. 31%), and science (28% vs. 16%).

AFTERSCHOOL PROGRAMS SUPPORT WORKING FAMILIES

Hawai'i parents agree that afterschool programs:

84% are helping working parents keep their jobs

84% are providing working parents peace of mind knowing that their children are safe

AFTERSCHOOL PROGRAMS ARE A SMART INVESTMENT

An overwhelming majority of Hawai'i parents favor public funding for afterschool and summer learning programs.

Research spanning several states shows that **every \$1 invested** in afterschool programs **saves at least \$3** by:

- ✓ Increasing kids' earning potential as adults
- ✓ Improving kids' performance at school
- ✓ Reducing crime and juvenile delinquency

21st Century Community Learning Centers

21st Century Community Learning Centers (21st CCLC) are local before-school, afterschool, and summer learning programs that serve students attending high-poverty, low-performing schools. These programs engage students in hands-on learning activities aimed at supporting their academic growth, provide a variety of enrichment activities to complement school-day learning, and offer educational and support services to the families of participating children. The 2022 Department of Education annual performance report of 21st CCLC found that among regular participants in need of improvement:

- ✓ **NEARLY 1 IN 2** improved their language arts or math grades
- ✓ **NEARLY MORE THAN 3 IN 5** improved their behavior in class
- ✓ **NEARLY 7 IN 10** improved their homework completion and class participation

In Hawai'i, 7,851 children in 52 communities take part in a 21st Century Community Learning Center. 21st CCLC grants are the only dedicated federal funding sources that support local communities' afterschool and summer programs. Demand for programming in Hawai'i is so great that 1 out of every 5 applications was not funded during the most recent competition.

AMERICAN RESCUE PLAN FUNDING IS HELPING INCREASE ACCESS TO AFTERSCHOOL AND SUMMER PROGRAMS

A spring 2023 survey of afterschool and summer program providers found that while less than 1 in 5 providers (17%) report that they have received COVID-relief funding, those with this funding stream have been able to use it to keep their doors open and increase access to their program. Programs report that they have been able to bolster staff recruitment efforts (47%), hire more staff (44%) and serve more students (44%), expand program offerings (38%), and offer new summer programs (18%).

Funds from American Rescue Plan (ARP) continue to present a tremendous opportunity to help increase access to afterschool and summer programs. For example, the Hawai'i Department of Education has allocated \$4.7 million in ARP Elementary and Secondary School Emergency Relief (ESSER) III funds to the After-School Plus (A+) Program. A+ is dedicated to supporting elementary school students across the state with family members who are working, attending school, or engaged in a job training program during the hours of A+ operations. Programming includes a chance for students to work on their homework, as well as enrichment opportunities like dance, crafts, theater, and sports. Thanks to ESSER III funds, A+ sites are able to offer a reduced monthly fee for programming to families.
