EVIDENCE OF AFTERSCHOOL’S IMPACT ON STUDENTS’ WELL-BEING

Only 10 states* have included questions regarding participation in afterschool programs in their state Youth Risk Behavior Survey (YRBS), conducted as a part of an effort by the U.S. Centers for Disease Control and Prevention. However, these additional questions have produced findings demonstrating positive correlations between participation in afterschool programs and young people’s mental and physical health. For example:

**ALASKA** Students participating in afterschool programs at least two days a week were 18% less likely to use alcohol, 39% less likely to use marijuana, and 28% less likely to have an unexcused absence.

**VERMONT** High schoolers who participated in at least one hour of afterschool activities were less likely than their non-participating peers to report carrying a weapon or report being threatened or injured by a weapon on school property.

**WISCONSIN** Students involved in at least one hour of extracurricular activities report lower rates of anxiety, depression, and suicidal thoughts.**

These student quotes are a small sampling of the invaluable supports and experiences afterschool programs are providing young people—from creating a safe space where they can connect with caring adults to helping them build the skills to reach their full potential.

However, in Pennsylvania, for every child in an afterschool program, 4 more would participate and are missing out, despite strong public support for afterschool. A national fall 2022 survey found that approximately 8 in 10 registered voters said that afterschool programs are an absolute necessity for their community (79%) and want their federal, state, and local leaders to provide more funding for programs (80%).

AFTERSCHOOL PROGRAMS ACCELERATE STUDENTS’ ACADEMIC GROWTH AND SUPPORT THEIR WELL-BEING

Among Pennsylvania students in afterschool programs:

- 69% are getting homework help
- 90% are interacting with their peers and building social skills
- 77% are engaging in STEM learning opportunities
- 79% are building confidence
- 85% are taking part in physical activities
- 64% are learning responsible decision-making
- 94% of Pennsylvania parents are satisfied with their child’s afterschool program

**The Wisconsin YRBS question in the middle school questionnaire asked, “During an average week when you are in school, how many total hours do you participate in school activities such as sports, band, drama, or clubs?” and the high school questionnaire asked, “Do you participate in any school activities, such as sports, band, drama, or clubs?”
Studies have shown that students regularly participating in quality afterschool programs attend school more often, are more engaged in school, get better grades, and are more likely to be promoted to the next grade. A 2022 evaluation by the Pennsylvania Department of Education found that students regularly attending 21st CCLC programs saw academic and behavioral gains. Among students who needed to improve academically, a majority improved in at least one academic measure—such as reading or math grades or academic performance as reported by teachers (53%), and approximately 1 in 3 showed growth in reading (36%) or math (32%). Additionally, according to teacher surveys, a majority of regular attendees improved completing their homework (66%), participation in class (66%) and classroom behavior (54%), and motivation to learn (57%).

AFTERSCHOOL PROGRAMS SUPPORT WORKING FAMILIES

Pennsylvania parents agree that afterschool programs:

- 81% are helping working parents keep their jobs
- 83% are providing working parents peace of mind knowing that their children are safe

AFTERSCHOOL PROGRAMS ARE A SMART INVESTMENT

An overwhelming majority of Pennsylvania parents favor public funding for afterschool and summer learning programs.

Research has found that every $1 invested in Pennsylvania afterschool programs leads to a return on investment of approximately $6.69 by:

- Reducing high school student drop out rates
- Reducing crime and juvenile delinquency
- Reducing drug and alcohol addiction and teen pregnancy

21st Century Community Learning Centers

21st Century Community Learning Centers (21st CCLC) are local before-school, afterschool, and summer learning programs that serve students attending high-poverty, low-performing schools. These programs engage students in hands-on learning activities aimed at supporting their academic growth, provide a variety of enrichment activities to complement school-day learning, and offer educational and support services to the families of participating children. The 2022 Department of Education annual performance report of 21st CCLC found that among regular participants in need of improvement:

- NEARLY 1 IN 2 improved their language arts or math grades
- NEARLY MORE THAN 3 IN 5 improved their behavior in class
- NEARLY 7 IN 10 improved their homework completion and class participation

In Pennsylvania, 33,091 children in 398 communities take part in a 21st Century Community Learning Center. 21st CCLC grants are the only dedicated federal funding sources that support local communities’ afterschool and summer programs. Demand for programming in Pennsylvania is so great that 1 out of every 2 applications was not funded during the most recent competition.
