EVIDENCE OF AFTERSCHOOL'S IMPACT ON STUDENTS' WELL-BEING

Only 10 states* have included questions regarding participation in afterschool programs in their state Youth Risk Behavior Survey (YRBS), conducted as a part of an effort by the U.S. Centers for Disease Control and Prevention. However, these additional questions have produced findings demonstrating positive correlations between participation in afterschool programs and young people's mental and physical health. For example:

**ALASKA**
Students participating in afterschool programs at least two days a week were 18% less likely to use alcohol, 39% less likely to use marijuana, and 28% less likely to have an unexcused absence.

**VERMONT**
High schoolers who participated in at least one hour of afterschool activities were less likely than their non-participating peers to report carrying a weapon or report being threatened or injured by a weapon on school property.

**WISCONSIN**
Students involved in at least one hour of extracurricular activities report lower rates of anxiety, depression, and suicidal thoughts.**

*AK, CT, MI, MN, NM, OH, VT, VI, WA, WI
**The Wisconsin YRBS question in the middle school questionnaire asked, "During an average week when you are in school, how many total hours do you participate in school activities such as sports, band, drama, or clubs?" and the high school questionnaire asked, "Do you participate in any school activities, such as sports, band, drama, or clubs?"
Studies have shown that students regularly participating in quality afterschool programs attend school more often, are more engaged in school, get better grades, and are more likely to be promoted to the next grade. A 2021 evaluation of Virginia’s 21st CCLC programs by The University of Memphis found that participants made both academic and behavioral improvements. Approximately two-thirds of students denoted as “need to improve” improved their math and reading grades by the third quarter of the school year. Additionally, according to surveyed teachers, an overwhelming majority of participating students improved their homework participation (78%) and behavior (74%).

AFTERSCHOOL PROGRAMS SUPPORT WORKING FAMILIES
Virginia parents agree that afterschool programs:

- **80%** are helping working parents keep their jobs
- **85%** are providing working parents peace of mind knowing that their children are safe

AFTERSCHOOL PROGRAMS ARE A SMART INVESTMENT
An overwhelming majority of Virginia parents favor public funding for afterschool and summer learning programs.

- **89%** are helping working parents
- **89%** are providing working parents peace of mind knowing that their children are safe

Research spanning several states shows that **every $1 invested** in afterschool programs **saves at least $3** by:

- Increasing kids’ earning potential as adults
- Improving kids’ performance at school
- Reducing crime and juvenile delinquency

21st Century Community Learning Centers
21st Century Community Learning Centers (21st CCLC) are local before-school, afterschool, and summer learning programs that serve students attending high-poverty, low-performing schools. These programs engage students in hands-on learning activities aimed at supporting their academic growth, provide a variety of enrichment activities to complement school-day learning, and offer educational and support services to the families of participating children. The 2022 Department of Education annual performance report of 21st CCLC found that among regular participants in need of improvement:

- **NEARLY 1 IN 2** improved their language arts or math grades
- **NEARLY MORE THAN 3 IN 5** improved their behavior in class
- **NEARLY 7 IN 10** improved their homework completion and class participation

In Virginia, 30,683 children in 148 communities take part in a 21st Century Community Learning Center. 21st CCLC grants are the only dedicated federal funding sources that support local communities’ afterschool and summer programs. Demand for programming in Virginia is so great that 3 out of every 10 applications were not funded during the most recent competition.

AMERICAN RESCUE PLAN FUNDING IS HELPING INCREASE ACCESS TO AFTERSCHOOL AND SUMMER PROGRAMS
A spring 2023 survey of afterschool and summer program providers found that while less than 1 in 5 providers (17%) report that they have received COVID-relief funding, those with this funding stream have been able to use it to keep their doors open and increase access to their program. Programs report that they have been able to bolster staff recruitment efforts (47%), hire more staff (44%) and serve more students (44%), expand program offerings (38%), and offer new summer programs (18%).

Funds from American Rescue Plan (ARP) continue to present a tremendous opportunity to help increase access to afterschool and summer programs. For example, Charlottesville City Public Schools used $236,000 of its ARP Elementary and Secondary School Emergency Relief (ESSER) III funding to provide summer school to its students during the morning and in the afternoon. It partnered with the YMCA and Boys & Girls Clubs to provide enrichment activities such as arts, music, and STEAM learning opportunities for their students.

The Afterschool Alliance is working to ensure that all children and youth have access to quality afterschool programs.
